## DESCRIPTION/ STATEMENT :

The children dress " *IMAGE* " is a piece of the colourful world of fashion .

The children artd ( artdesingn) " *IMAGE* " is a an interpretation and realisation of being a VICTIM of the colourful and wonderful world of fashion .

Victim and IMAGE in the sense of photography and being an adict of wearing lovely fashion and an addict of presentation .

The fashion photographs ( analog) , made during the Fashion Shows in Paris are the basic subject of the print . Collages are made of positive and negative images ( photographs ) and are arranged as a print . Beneath the photograph- collage the cotton is painted ( freestyle print) multi- colourfully .The used print technique is traditional handmade flatscreenprinting .

Furthermore , some digitalprints of "snapshots" are added on the finished dress . The felt pieces underlines the simplicity of the main idea as well as the colourfulness and many-sided world of fashion and the individualism of the wearer .

\*\*\*\*\*

The " *Beauty of Exposure* " is another interpretation and ARTD in black and white of the main idea.
